

To our Valued Cheer Families,

We know that these are unsettling times you may be facing some challenges related to the impact. Olympia wants you to stay safe and help others to do the same as we come together to stop the spread of COVID-19.

We're all feeling the gravity of the situation, waking each morning wondering what the day will bring. At this moment we are all adjusting to new government regulations & recommendations to curb this pandemic.

In times of uncertainty it's crucial that communities come together... especially for our children.

Olympia is committed to maintaining balance, and some consistency for our athletes during this time.

Reaching out and staying in touch

Like many gyms in our area, we have shifted to a virtual delivery of service for the next 30 days as we try to plank the curve of COVID-19.

We will be offering online classes, resources for parents on things they can do at home, operating virtual practices, team building activities and opportunities for our athletes to connect virtually to the cheer community they know and love.

With social distancing in full effect this will be a vital source of connection for our athletes.

Competitions & Practices

We have heard from the Event Producers, competitions have been postponed until May and a few have yet to be determined. As information unfolds we will provide the new dates.

Once we are back to our new normal and able to commence practices (May), we will be providing team practices on weekends and weekdays to make up for lost time.

Tumbling and private classes will be rescheduled and athletes can visit our homepage and Instagram to take part of our virtual content.

Supporting your needs

Our business is fighting to survive this too. We need your help to continue to offer our programming but to also ensure there is a viable and healthy cheer gym for your kids to come back to.

We are going to re-evaluate our offerings and will remain closed until *April 20th, 2020*.

Being there for our communities

COVID-19 is a global health challenge and has placed our local businesses and communities under significant strain. We'll continue to connect with our community partners to determine where the greatest needs are so we can lend a hand.

Please let us know if any of our families need food, medicine or crafts dropped off to your doorstep.

Be safe and continue to protect yourself and your families. We will get through this together!

Love Lorraine & Colleen
